

Your best asset in payroll management

## Professional Knowledge of Payroll Administration

### Company Overview

At Ace Payroll, we offer in-depth knowledge and experience in payroll and payroll tax laws. Our seasoned professionals utilize a consultative approach in order to customize a solution for each client. Our payroll solutions are all supported by the latest advances in payroll administration technology and managed by a dedicated specialist and tax expert.

As a payroll provider, our organization's operations are routinely audited in accordance with latest accounting standards to provide assurance on our internal controls, procedures and processes.

### Our Mission

Ace Payroll Services seeks to optimize the performance of our clients' businesses through the delivery of extraordinary service and innovative payroll, HR, and benefit solutions.

### Our Philosophy

We take a systematic approach that looks to serve the larger business needs of our clients. Rather than stacking our services together, we keep them separated in order to provide flexibility and efficiency. Our goal is to help vet these services so our clients only end up with what they need and what will work within their own structure.

### Our Background

Ace was founded in 1994 by two accountants who saw the potential of building a payroll company upon their extensive accounting expertise.

Operating both as Ace Payroll Services, Inc. on the East Coast and Payroll Systems on the West Coast, we have grown to become one of the larger non-publicly owned payroll processing companies in the United States. We focus on serving small to medium-sized businesses. Our client base represents a wide array of industries including, but not limited to, manufacturing, professional services, retail, construction, health care, nonprofit, trucking, busing and transportation, insurance, employment agencies, unions, restaurants, and religious organizations.
